Since ASP.NET 4.5 is just a superset to ASP.NET 4.0, by adjusting your site to ASP.NET 4.0 via our Control Panel, you should be able to use ASP.NET 4.5 directly. The following article describes the steps to enable ASP.NET 4.0/ASP.NET 4.5 on our Control Panel. Please be advised that ASP.NET 4.5 is only available for customers who registered the service after 1st April 2012. For customers registered before this date, you need to contact our Support Team to arrange for the migration to a server that supports ASP.NET 4.5. Please note that migration fee applies here.

If, for any reasons, your ASP.NET 4.5 site fails to work, please kindly raise a ticket via our Help Desk System and our Support Team will have a look at it.
