

How to Setup Full Permission in Plesk 9.5?

Authored by: **ASPHostServer Administrator** [asphostserver@gmail.com]

Saved From: <http://faq.asphosthelpdesk.com/article.php?id=294>

Steps by steps to grant full permission in Plesk 9.5:

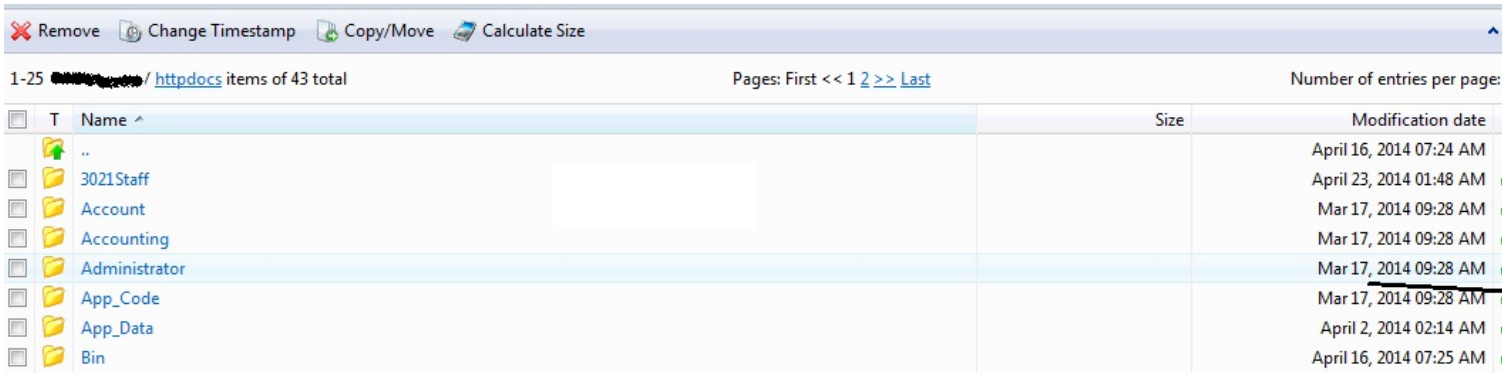

1. Login to your Control Panel
2. Click on your domain name
3. Find File Manager option on your Control Panel

4. Go inside your httpdocs folder

5. Go to the folder that you want to grant full permission by click padlock button on the right side.

6. Then please grant full permission to Plesk IIS User and Plesk IIS WP User

Setting up Access Permissions

★ Favorites ▾ Visited Pages

- Allow inheritable permissions from the parent to propagate to this object and all child objects. Include these with entries explicitly defined here.
- Replace permission entries on all child objects with entries shown here that apply to child objects.

C:/ClientSites/ablesin.com/httpdocs/Account

Group or user names	Permissions for IUSR_kave911
FTP account (ftp_ablesin.com)	<input checked="" type="checkbox"/> Full Control
Plesk IIS User (IUSR_kave911)	<input type="checkbox"/> Modify
Plesk IIS WP User (IWPD_175(kave911))	<input type="checkbox"/> Read & Execute
Plesk Domain User (kave911)	<input type="checkbox"/> List Folder Contents
Administrators	<input type="checkbox"/> Read
SYSTEM	<input type="checkbox"/> Write

7. Tick Replace permission entries on all child objects with entries shown here that apply to child objects.

8. Click OK
