If you have not had a domain name for your website, you need to purchase a new one. Domain name is your identity on the web and it serves as a "business nameâ€• for your online business. You need to start planning and choose a good domain name as it represents your online presence in Internet. Once you have the name, please go to http://asphostserver.supersite.myorderbox.com/, create a new account on this portal and proceed with the purchase of the domain name.

We also support multi-domains hosting plans that allow you to host more than one website/domain. Please check on our website for further information.
