In order to deploy your website via webDeploy tool, there are several requirements that you need to meet:

1. You need to make sure that the webDeploy tool is installed on your local computer. Please refer to
http://www.iis.net/download/webdeploy to download this tool
2. You need to raise a ticket via our Help Desk System to our Support Team. Our Support Team will setup
your site to allow WebDeploy technique. Additional WebDeploy setup fee applies here.
3. Our Support Team will advise you the following details:

- Server:
- Username:
- Password:
- Site Name:
- Destination URL:
