Please be advised that ASP.NET MVC 4.0 has been installed on the server and you can make use of it directly. You will not see any option to choose on our Control Panel.

Please be advised that ASP.NET MVC 4.0 is only available for customers who registered the service after 1st April 2012. For customers registered before this date, you need to contact our Support Team to arrange for the migration to a server that supports ASP.NET MVC 4.0. Please note that migration fee applies here.

If, for any reasons, your ASP.NET MVC 4.0 site fails to work, please kindly raise a ticket via our [Help Desk System](#) and our Support Team will have a look at it.
