---

This applies to anyone who uses REST service using ASP.NET Web API. When you try to send HttpDelete and HttpPut Request, you can occasionally see this error message:

405 - HTTP verb used to access this page is not allowed

To resolve this issue, you just need to add several lines on your code:

```
<system.webServer>  <modules>      <remove name="WebDAVModule" />  </modules>
<handlers>          <remove name="WebDAV" />  </handlers></system.webServer>
```
