Monitoring Tools For Windows

Authored by: **ASPHostServer Administrator** [asphostserver@gmail.com] Saved From: <u>http://faq.asphosthelpdesk.com/article.php?id=320</u>

Monitoring your server resources is a critical part of server management. This guide will show you how to monitor different resources on your server and identify when it may be time to think about upgrading to get more resources.

How to Access the Resource Monitor in Windows Server

From your Desktop in Windows Server, press $\tilde{A}_{\dot{c}}$ + R simultaneously to bring up the Run menu.

I Run X
Type the name of a program, folder, document, or Internet resource, and Windows will open it for you.
Open: v This task will be created with administrative privileges.
OK Cancel <u>B</u> rowse
🐔 🔎 🗇 📥 🗾 🥽 🌍 🖅 Run

Type "resmon" in the text box, and click "OK."

Page 2/7

You will now see your Resource Monitor dashboard.

The processes section of the screen details current processes that are currently using your CPU resources.

The services section outlines all the services running on your server and the load they are applying to your CPU resources.

Memory The Memory tab at the top of the window will show you the current load all of your processes are putting on your RAM resources. It will also show you a bar of memory in use, modified, in standby, or free.

Physical Memory	📕 1118 MB II	n Use	n 2964 MB	Available
Hardware Reserved 1 MB	In Use 1118 MB	Modified 13 MB Available Cached Total Installed	Standby 2602 MB 2615 MB 4095 MB 4096 MB	Free 362 MB

Disk Usage

The Disk tab will show you detailed information regarding your disk space and I/O processes. Under the Storage section on this tab, you can find the remaining free disk space in MB.

The Network tab will show you detailed information regarding the network activity of your server. This information includes sent and received bytes per second, current TCP connections, as well as detailed information about the ports on your server.

Running Low On Resources? If you seem to be hitting the limits of the current resources allocated to your server, it may be time to either uninstall or optimize your programs or upgrade your service.
