Yes, we can certainly arrange it for you. Please be advised that our Control Panel only supports 1-to-1 association and this means that 1 database user can only be associated to 1 MS SQL database only. If you want 1 database user to be associated to more than 1 SQL database, we will have to custom set this up for you.

Please raise a ticket via our [Help Desk System](#) and please advise us the database username and the databases you want to associate to.
